IMPACT LIGHTING INC.'S LED SIGNAGE

Impact Lighting Inc. manufactures and fabricates high quality Indoor and outdoor LED display signage that add excitement and high visibility to your messages. Computer LED programmable capabilities allow you to reach your audience with easy-to-implement and cost effective messages for endless Indoor and outdoor applications from advertising to employee communications.

ADVANTAGES OF LED SIGNS:

- Remind customers and prospects about the benefits of your product or service.
- Encourage existing customers to buy more of what you sell.
- Attract new customers and replace lost ones.
- The business owns the form of advertising.
- The LED advertising works for the business 24 hours a day, 365 days a year. LED display
- Outdoor LED signs acts as the "salesman on the street" attracting customers into the business.
- The advertising speaks directly to the potential customers as they drive past the business location, and the LED sign makes the business a landmark in its community.
- Quickly "brand" your business site in the local community.
- Best and most cost-effective forms of paid advertising. The only form of advertising that may be more powerful is word of mouth.
- The effectiveness of LED signs are not limited by space or surface area constraints as with a reader-board.
- LED signs allows you to market your products and services to your immediate trade area and prevent wasteful advertising expenses.
